

Year 4 half termly home learning project

Autumn 2026 1st half

Children, for your half termly project we would like you to do some market research about the soups that are available to buy. These can be fresh soups on the chiller aisle, tinned soups or dried soups. You might want to focus on one of these or do a comparison of all three. You could compare the nutritional content and price of each for the same soup flavour, find out what different soup flavours are available and how many are vegetarian/vegan, look at the packaging and which you like/don't like, compare what's available in different shops, try eating some, try making your own and comparing the cost and nutritional value with a shop-bought version of the same flavour. The choice is yours as is how you present your research. You can tell the class, make a poster, create a photo gallery, make a PowerPoint or something else.

Do they look appealing? Are the flavours tempting?
Are they nutritious?

Good luck children and we are looking forward to hearing about your research! You can report back to us anytime this half term.

Mrs Rathbone and Mrs Souissi
