

Friday 2nd October 2026

English

In English we have been investigating and talking about biographies linking to our learning on Black History Month. Have a go at answering these questions? If you don't know research your answers:

Can you remember what a biography is?

What are the features in a biography?

What is a biography about?

Is a biography written in the first person or the third person?

What does writing in the third person mean?

If you have any biographies at home or you have read any biographies, please bring them in to share with the class if you would like.

Maths

This week in Maths we have been ordering and comparing numbers to 1,000 by looking at the value of the digits in each column. We have also been using these mathematical symbols to compare our numbers and to write them in a number sentence $< > =$.

Have a go at the questions below:

Use the symbols $<$, $>$ or $=$ to make these statements correct.

745		729
924		873
367		412
157		192
858		839
568		581

Order these numbers from smallest to greatest.

719	326	564	751	382
smallest				greatest

Challenge: Can you think of some of your own statements to give to someone else to try and answer?

Have they used the correct mathematical sign? Did they look at the right digits to compare?

Science

This week in Science the children were learning all about reflection and what that means. To test out reflection we were experimenting on what materials we found to be reflective and what materials were not reflective. Have a go at home to see if you can find different materials to the ones in class. Were they reflective or not? Draw a table to record your findings.

Challenge: if I wanted to go cycling to the shops at night what should I wear for people to notice me? Design a coat that is suitable for me to wear at night when riding my bike.

Statutory spellings:

Please continue to practise your statutory spellings at home.

arrive

believe

bicycle
